Skills C#, .Net, SQL Server, ASP.Net, JS, HTML, CSS, Python, React, VMWare, Docker, Jenkins, Git

Experience

Senior Engineer at James McGuinness & Associates - Schenectady, NY 10/18 - Present

Full stack .Net developer for CPSEPortal & Medicaid Service Bureau products

- Added and improved ASP.NET features used by thousands of providers across 42 NY counties
- Handle multiple data transfers and transforms with SQL, SSIS, SFTP, and RESTful APIs
- Successfully grew userbase and client billing to 100 million dollars per year
- Perform code reviews and mentoring for new team members
- Manage production builds, databases, and development/testing/staging environments

Lead Developer on Woodstock Document Sharing project

- Utilized ASP.NET Core Blazor Server, SQL Server, and Dapper to create a secure document sharing application for a client
- Implemented logging with the ELK (ElasticSearch, Logstash, Kibana) stack
- Designed with Material Design principles to keep the UI responsive, consistent, and attractive

Junior Developer at James McGuinness & Associates - Schenectady, NY 6/14 - 10/18

Commercial Applications division consultant for Counties, Schools, and Therapy agencies

- Worked with agency and school clients to determine business needs and software requirements
- Developed and tested features and bug fixes for multiple ASP.Net and MVC websites
- Created screens for user data entry, auditing, billing, reporting
- Utilized C# to create and parse/process Medicaid files in the X12 format
- Administered and performance tuned SQL server databases.

Software Developer Intern at Taylor Made Systems - Gloversville, NY 5/13 - 8/13

Worked to modernize and expand taylormakesystems.com

- Collaborated with the marketing team to design more intuitive layout
- Developed site to implement updated branding and incorporate new products
- Presented development progress to executives
